Sonia Kondratska

Organized and hardworking University student. Successful at task-planning and managing multiple priorities.

Projects

Tastyfy [website](#)

<https://github.com/kisellsn/Tastyfy>

- University team project. This is a music preference analyzer that helps users learn more about their tastes and discover new music that matches their personal preferences.
- I was responsible for managing the back end of the website and for communicating with the Spotify API.

Tech stack: Python, Flask Framework

AutoPDFForge [website](#)

https://github.com/kisellsn/webPDF_converter

- University self-project. Site that uses various libraries and APIs to convert files, images and webpages to PDF

Tech stack: Python, Flask Framework, SQLite

HunterBot [telegram bot](#)

https://github.com/kisellsn/hunter_bot

- Telegram bot designed to locate rental apartments based on user-defined criteria.

Tech stack: Python, PostgreSQL
